List Making

Create a list:

- *“Alexa, create a list.”* (Alexa will then prompt you to name the list.)
- *“Alexa, create a shopping list.”*

Add one or more items to your list:

- *"Alexa, add bread, milk and eggs to my shopping list."*
- *“Alexa, I need to buy laundry detergent.”*
- *“Alexa, create a to-do.”*

Delete an item from your list: “*Alexa, remove eggs from my shopping list.*”

Check your list:

- *“Alexa, what’s on my To Do list?”*
- *“Alexa, what’s on my shopping list?”*

FYI: You don’t need to remember all the lists you’ve created, or all the items on each list! They’re all reviewable and editable in the Alexa application. And, for those who are passionate about list making, there are a wide range of related Alexa skills to explore and activate – some of which are integrated with other leading productivity apps, like ToDoist and Any.do.
